CAREER OPPORTUNITIES IN PARAMEDICAL

Paramedical courses are job oriented and present ample employment opportunities. Another benefit of the Paramedical course is that there are options for postgraduate, graduate, diploma, certificate courses that are of varying durations from 3 years to 6 months. One could choose to do a paramedic course at any stage of his/her career even after completion of 10th standard exams. Some courses also give the benefit of no mandatory science stream in 12th

PLACEMENTS

Paramedical courses are medical training courses that are job oriented. Paramedical courses are quite training specific and train the students for real-life medical situations. The significance of paramedical courses has been realized by the increasing need for skilled paramedics in the medical field. This is important to mention that without paramedics the medical field would be crippled. Paramedics is an amazing field to build a career in the medical field in a short period and budget, unlike the conventional MBBS degree.

- CT Scan Technician
- MRI Technician
- X-ray Technician
- Operation Theatre Technician
- Radiology Technician
- Laboratory Technician
- Ambulatory care Nurses
- Home health care Nurses
