E- Verbal Ability	1	caste as a site of contestation at the fault lines between notions of the public and private, tradition and modernity, the religious and the secular. In this sense, a critical ethnography of caste entails attention to caste, understood as a relational identity marker, as it gets produced and contested within one important field of discourse and practice that constitutes it, namely secularism (see Dhreshwar, 1993). A larger normative debate about limits and possibilities of secularism within India begs for an exploration of the everyday cultural politics of secularism in the institutional spaces of Indian modernity, such as that of a college. Educational institutions are key sites for embodying the contradictory dynamics of Indian secularism. The everyday cultural politics of caste, religion, and community within a putatively secular space illuminates the educational processes through which modern, secular citizens are produced in globalizing India. Debates and transformations in academic theories of caste have been entangled with the contested presence of caste within modern India. Early anthropological studies of caste in India have usually studied it as a form of “tradition” and/or “religion”. The privatization of religion and tradition and its expulsion from the secular spaces of the state, democratic politics, and civil society is a cornerstone of definitions of modernity. It is this understanding of the religious and the secular, the modern and nonmodern, that has underwritten the dominant understanding of the Hindu caste system as decidedly “not modern” within the anthropology of South Asia. (From Liberalizations of Children: Gender, Youth, and Consumer Citizenship in Globalizing India by Rittie A. Lukose) <i>Read the statements below and choose the most appropriate option:</i> 1. Caste is a “traditional” practice anachronistically persisting within modern India. (Wrong) 2. Educational institutions are key sites for embodying the contradictory dynamics of Indian secularism. (Right) 3. The privatization of religion and tradition and its expulsion from the secular spaces of the state is a cornerstone of definitions of modernity. 			(1) is correct while (2) and (3) are wrong.							
E- Verbal Ability	2	Read the passages and give the answer of the question: Far from being the opposite of the secular and the modern, “caste”-as both politicians and anthropologists have deployed the term- is a complicated and messy product of them. Linking the everyday negotiations of caste and secularism to the languages and repertoires of state policy discourse, I examine caste within the larger horizon of secular, democratic citizenship within India rather than posit caste as a “traditional” practice anachronistically persisting within modern India, as much literature has done, I situate caste as a site of contestation at the fault lines between notions of the public and private, tradition and modernity, the religious and the secular. In this sense, a critical ethnography of caste entails attention to caste, understood as a relational identity marker, as it gets produced and contested within one important field of discourse and practice that constitutes it, namely secularism (see Dhreshwar, 1993). A larger normative debate about limits and possibilities of secularism within India begs for an exploration of the everyday cultural politics of secularism in the institutional spaces of Indian modernity, such as that of a college. Educational institutions are key sites for embodying the contradictory dynamics of Indian secularism. The everyday cultural politics of caste, religion, and community within a putatively secular space illuminates the educational processes through which modern, secular citizens are produced in globalizing India. Debates and transformations in academic theories of caste have been entangled with the contested presence of caste within modern India. Early anthropological studies of caste in India have usually studied it as a form of “tradition” and/or “religion”.
